The Pantone colours listed are a close representation to our standard colours and not an exact match . We have carefully selected the closest Pantone for each AK standard colour. Variations may occur due to elements out of our control such as differences in fabric, lighting, and dye lots. Due to the nature of fabrics and colours we will not be responsible for any variations.

We offer sublimated fabric colour swatches available for visual reference.

Please note, for dyed fabric, we highly recommend getting a sample of the fabric/colour/product for visual reference as colours vary from dye lot to dye lot.
